Projects

ShoppingMart-Ecommerce | *MongoDb , NodeJs , RactJS , Vercel , Render, BrainTree* Checkout — **July 2023**
- I developed a MERN e-commerce web app with user authentication, user/admin dashboards, product filtering, cart management, secure payments using Braintree, and order processing. Users can sign up, log in, update profiles, view orders, and make payments. Admins manage categories, products, and order statuses, allowing them to view and change the status of orders (e.g., processing, canceled, delivered). These status changes are immediately reflected on the user's end.

FOOD RECIPE | *Reactjs, Context API, Hooks , MUI* Checkout — **October 2022**
* Built a Food Recipe Website in which u can find food recipe and its video tutorial(How to make) too, by searching the name of dish. All alphabets are also shown on Website itself by which u can click any of it and you will get all dishes starts with that particular letter.

MOVIE BOX WEBSITE | *React Js, TMDB API KEY, Hooks* Checkout — **July 2022**
* Developed a Netflix clone using ReactJS, featuring a dynamic banner and diverse categories like "Top Rated" and "Originals." Utilized TMDB API to fetch real-time content, ensuring up-to-date movie information. The project showcases strong skills in React and API integration, creating an intuitive and enjoyable streaming experience.

MONEY ACCOUNTANT | *React JS, Context API,Hooks, MUI Chakra UI,Redux toolkit* Checkout — **March 2022**
* "Money Accountant" - React expense tracker project. Enables users to add, remove expenses (name and cost). Real-time updates on remaining budget and total spending. Demonstrates React, state management, data manipulation skills for effective budget tracking.
